

AI Loan Application

Business Objective

Develop an AI-assisted conversational loan application module that enables prospective MSME customers to interact with a virtual loan assistant through a natural, ChatGPT-style interface. The solution should guide customers through the loan enquiry and application process by collecting information one step at a time, including loan purpose, loan type, funding requirements, business details, collateral availability, and eligibility-related information. Based on the customer's responses, the AI assistant should provide contextual guidance, explain loan products, and seamlessly transition the customer to the document upload stage for further processing.

Business Benefits

Improve customer experience through conversational banking.

Reduce manual data entry and incomplete applications.

Provide personalized loan guidance based on customer responses.

Increase application completion rates with step-by-step assistance.

Capture structured information for downstream credit assessment and AI-driven underwriting.

Could not identify user

The customer initiates a loan application through the AI Assistant. The AI collects loan and business information, validates customer responses, guides document upload, generates an application summary, and submits the completed application to the Loan Origination System.

Overview: The AI Loan Application module enables MSME customers to initiate a loan application through a conversational AI assistant. The assistant guides customers step-by-step by collecting loan requirements, business details, financial information, and supporting documents before submitting the application to the Loan Origination System for further processing.

Scope

In Scope

Conversational loan enquiry

Loan product selection

Business information capture

Financial information capture

GST and Udyam details

Document upload
Application summary
Submission
Out of Scope
Credit appraisal
Loan sanction
Physical verification
Loan disbursement
EMI servicing

Actors

Actor Responsibility
MSME Customer Applies for loan
AI Assistant Conducts conversation and validates responses

Preconditions: Customer is authenticated.

Customer has selected "Apply for Loan".

AI Assistant service is available.

Required loan products are configured.

Postconditions: Loan application is created. Customer receives an Application ID. Documents are stored successfully. Application moves to Document Verification.

Business Rules

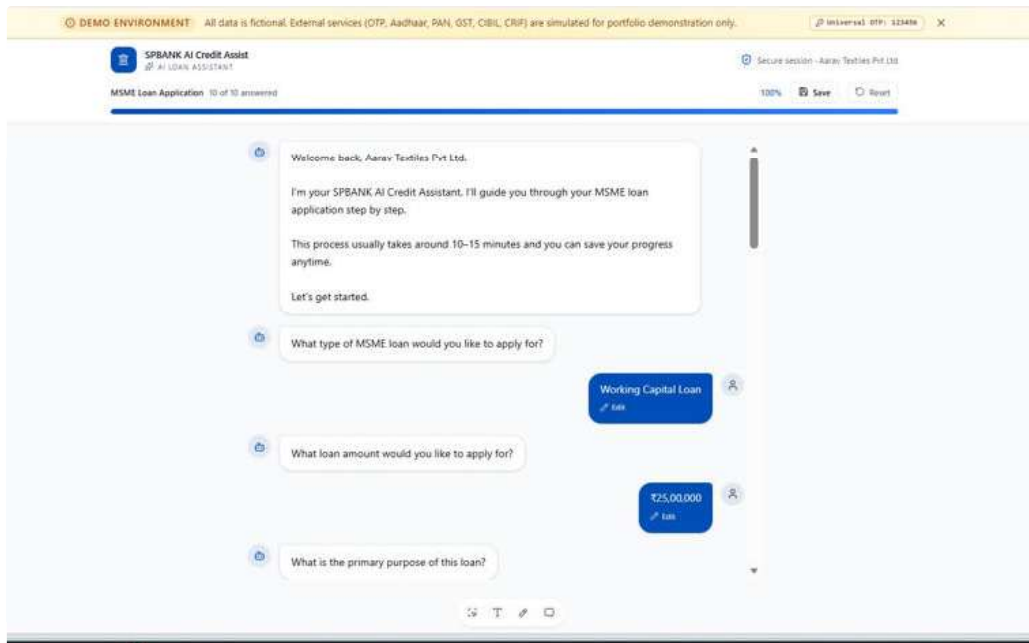

Rule ID	Business Rule
BR-AI-001	AI shall collect information only and shall not make lending decisions.
BR-AI-002	Mandatory fields must be completed before submission.
BR-AI-003	AI shall ask only questions relevant to the selected loan product.
BR-AI-004	Customer can save the application as a draft.
BR-AI-005	Uploaded documents must be validated for file type and size.
BR-AI-006	AI shall generate an application summary before submission.

Functional Requirements

ID	Requirement
FR-001	AI shall greet the customer.
FR-002	AI shall capture loan requirement details.
FR-003	AI shall capture business information.
FR-004	AI shall validate mandatory fields.
FR-005	AI shall guide document upload.
FR-006	AI shall generate an application summary.
FR-007	AI shall submit the application to LOS.

Exception Scenarios

Scenario	System Response
Customer exits conversation	Save draft
Internet disconnected	Resume conversation
Invalid GST Number	Ask customer to re-enter
Mandatory field missing	Prevent next step
Upload failed	Retry upload
Session expired	Redirect to login

Related User Stories

US-AI-001: Start AI Loan Application

As an authenticated MSME customer,

I want to start a loan application through the AI Assistant,

So that I can apply for an MSME loan using a guided conversational interface.

Acceptance Criteria

Given the customer is logged in,

When the customer selects "Apply for Loan",

Then the AI Assistant shall display a welcome message and initiate the loan application conversation.

Business Rules

Customer must be authenticated.

AI Assistant shall display one question at a time.

Conversation starts only after the customer initiates the application.

US-AI-002: Capture Loan Requirements

As an MSME customer,

I want to provide my loan requirements through the AI conversation,

So that the bank can identify the appropriate loan product and funding requirement.

Acceptance Criteria

AI shall ask for:

Loan Type

Loan Amount

Loan Purpose

Mandatory fields must be completed before proceeding.

AI shall validate the entered values before moving to the next section.

Business Rules

Loan amount must be greater than zero.

Loan purpose is mandatory.

AI shall ask only questions relevant to the selected loan product.

US-AI-003: Capture Business Information

As an MSME customer,

I want to provide my business details through the AI Assistant,

So that the bank can evaluate my business profile during the loan application.

Acceptance Criteria

AI shall collect:

Business Name

Constitution

Industry Type

Years in Business

GST Registration Status

Udyam Registration Status

AI shall validate mandatory information before proceeding.

Business Rules

Business Name is mandatory.

Constitution must be selected from the available options.

GST and Udyam details shall be requested only when applicable.

US-AI-004: Upload Supporting Documents

As an MSME customer,

I want to upload the required supporting documents,

So that my loan application can proceed for further verification.

Acceptance Criteria

AI shall guide the customer to upload the required documents.

Uploaded files shall be validated for supported file types and size limits.

AI shall notify the customer if any mandatory document is missing.

Business Rules

Only supported file formats shall be accepted.

Mandatory documents must be uploaded before submission.

Invalid uploads shall prompt the customer to retry.

US-AI-005: Review and Submit Loan Application

As an MSME customer,

I want to review all the information I have provided before submission,

So that I can ensure my application is complete and accurate.

Acceptance Criteria

AI shall display an application summary.

Customer shall be able to edit previously entered information before submission.

Upon confirmation, the application shall be submitted successfully.

The system shall generate a unique Application Reference Number.

Business Rules

Submission is allowed only when all mandatory information and documents are complete.

AI Assistant shall not make any loan approval or rejection decision.

Submitted applications shall be forwarded to the Loan Origination System for further processing.
