

Document Upload & Validation

Business Objective

Enable customers to securely upload mandatory loan documents through the AI Assistant, allowing the Loan Origination System (LOS) to perform automated document validation before initiating regulatory verification and credit assessment.

Business Rules

Only supported file formats (PDF, JPG, JPEG, PNG) are accepted.

Maximum file size per document shall not exceed the configured bank limit (e.g., 10 MB).

Mandatory documents must be uploaded before submission.

Uploaded documents shall be encrypted during transmission and storage.

Customers may replace a document before final submission.

Each uploaded document shall be linked to the Application Reference Number.

All upload activities shall be recorded in the audit log.

Documents shall be associated with the corresponding Application Reference Number.

Only successfully validated documents shall be forwarded for regulatory verification

S-301 Upload Documents

As an MSME customer,

I want to upload the requested loan documents

So that my loan application can proceed for verification.

US-302 Validate Uploaded Document

As the AI Document Validation Engine,

I want to validate uploaded documents for format, size and quality

So that only acceptable documents move to the next stage.

US-303 Reject Invalid Documents

As an MSME customer,

I want to receive validation errors immediately

So that I can upload a corrected document.

US-304 Store Verified Documents

As the Loan Origination System,

I want to securely store verified documents

So that they are available for credit processing and audit.

US-305 Proceed to Regulatory Verification

As the Loan Origination System,

I want to initiate regulatory verification after successful document validation

So that the customer's eligibility assessment can begin.

Scenario

Scenario 1: Upload Required Documents

Given the customer has successfully completed the loan application,

When the AI Assistant requests the mandatory supporting documents,

Then the customer shall be able to upload the required documents securely.

Scenario 2: Successful Upload

Given the customer selects a valid document,

When the upload is completed successfully,

Then the system shall display a confirmation message and update the document status as Uploaded.

Scenario 3: Invalid File Format

Given the customer selects an unsupported file format,

When the customer attempts to upload the file,

Then the system shall display an appropriate error message and prevent the upload.

Scenario 4: Missing Mandatory Documents

Given one or more mandatory documents have not been uploaded,

When the customer attempts to proceed,

Then the system shall identify the missing documents and prevent progression until all mandatory documents are uploaded.

Scenario 5: Initiate Document Verification

Given all mandatory documents have been uploaded successfully,

When the customer completes the document upload stage,

Then the system shall mark the application status as "Document Verification Pending" and initiate the document verification workflow.

Non-Functional Requirements

ID	Requirement
NFR-301	Maximum upload size shall be 10 MB per document.
NFR-302	Documents shall be encrypted during transmission (HTTPS/TLS).
NFR-303	Uploaded documents shall be encrypted at rest.
NFR-304	Document upload response time shall not exceed 5 seconds under normal conditions.
NFR-305	The system shall maintain an audit trail for all upload activities.
NFR-306	The system shall support concurrent uploads from multiple users.

6. Add Dependencies

Dependencies

- Customer authentication completed successfully.
- Loan application created.
- Application Reference Number generated.
- AI Assistant available.
- Document Management System (DMS) available.

7. Assumptions

Assumptions

- Customer possesses all required documents.
- Customer has internet connectivity.
- Supported document formats are available.

- AI validation services are operational.
-

8. Out of Scope

Out of Scope

- Manual document verification by bank staff.
- Credit appraisal.
- Regulatory verification.
- Bureau verification.
- Loan approval.
